

What's blue loud and out of control? "Gonzo"! This is Matt's 1960 Bonneville, and he gave us free reign to build it like it needed to be built. Gonzo features chopped, flat-bottomed, and narrowed Fat Bob tanks, one-off finned primary covers, finned timing cover, and new thousand-piece twisty exhaust pipes :D

---

Here is a very special build, "Old Man", which started off as a numbers matching 1958 Triumph T110. This bike was commissioned to commemorate our client's late and VERY loved father Rick. This build got our custom split tanks, some special leather work on the saddle, and a full complement of our latest mechanical upgrades for vintage Triumphs. "Old Man" now lives in California.
